

## Season 1206.3

- Serger Tips – Serging Woven Fabrics

Fabric, Patterns and Sewing Supplies are found on:

[The Angela Wolf Pattern Collection](#)

Serging woven and loose weave fabrics can be a challenge. Here are a few adjustments to make on the serger:

- Adjust the differential feed to prevent the fabric from stretching out.
- Adjust the presser foot pressure.
- Widen the stitch width to allow the threads to capture enough of the fabric that the threads don't fall off.
- Narrow the stitch length to cover more fabric with stitches.

Test the stitch on the fabric and practice serging around curves before you start the project.
